

123VideoMagic Pro is an easy-to-use video shooting and editing software. It helps in creating professional videos with great ease. Green ... is 3 times brighter than black and is more visible on your monitor screen. Therefore, when editing a video, you will see green lines that will only become visible when you change the brightness level. These green lines will appear in the corners of the video and in the parts you are editing. They are part of the program and do not need to be disabled. 123VideoMagic Pro contains over 50 templates to provide professional video effects.
