## What's New in the?

It's a time when society is fast-paced, where every second is needed to stay on top of things. If you feel as though you are constantly running around, doing things like running from one meeting to another, working on one project to the next and feeling a lack of time for personal activities, then maybe you are not doing enough. But, what if there was a way to get more done in less time? If you feel like you are constantly running around, doing things like running from one meeting to another, working on one project to the next and feeling a lack of time for personal activities, then maybe you are not doing enough. But, what if there was a way to get more done in less time? We hope that *Zazu* will give you that extra boost to get you through your day with ease, allowing you to be the productive genius you really want to be. Do you want to make your computer's desktop easier to navigate? Or, are you interested in finding the best shortcuts to speed up your workflow? If you feel that your life would be easier if you could find all those shortcuts and buttons right on your desktop, then you might be interested in using *Zazu*. It is a cross-platform application for the Mac, PC and Linux, which allows you to bring many of your favorite features and shortcuts to your desktop. There is something for everyone in this app! Features: - Drag and Drop support for most of your web browser's bookmarks and the file manager (Nautilus) - Desktop shortcuts for both applications and system commands - And many more! How to get started: - If you are a Mac user, follow the instructions here: - If you are on Windows, download the zip file and extract the folder. - If you are on Linux, simply open up a terminal window and type in the following command: `sudo add-apt-repository ppa:ortha/ppa` `sudo apt-get update` `sudo apt-get install zazu` - The software is easy to use! If you want to take things even further, the developers have also created a sample configuration file that you can simply copy and paste into the *zazu* directory that you created in the terminal. This will allow you to automate many of your favorites features.
