Magic GrowDesk is an easy to use desktop wallpaper that grows as you work. A new image appears at the top of the desktop. You can choose from a large selection of wonderful images from the TimeMachine Archives. The images are found by searching for a category, artist, title, date, or tag. Each image appears with a single click. Magic GrowDesk is a powerful metaphor - The desktop is equivalent to the garden. Images are equivalent to flowers, while you are the gardener - the one who is responsible for that landscape. Magic GrowDesk is a unique desktop wallpaper that grows as you work. If you have used similar products before, you may be familiar with the concept of a "grow desk." A grow desk is a desk that grows and therefore you have to spend more time and more effort tending to it. Instead of allowing your desk to get out of control, you can now easily keep an image of your choice on it and keep your office looking beautiful. Magic GrowDesk could also be thought of as a taskbar. If you put it on the taskbar, it stays on the taskbar. If you put it in the tray it stays in the tray. If you drag it into the system tray it grows out of the system tray. It's easy to customize your desktop wallpaper and easily add and remove wallpaper at any time. At any time you will have a fully customizable list of wallpapers to choose from. Imagine a desktop wallpaper that changes throughout the day to keep up with the current time and your surrounding environment. Now this is Magic GrowDesk. Extended by the following apps: (The majority of Magic GrowDesk's features were extended by Magic GrowDesk.) M-Soft Workspace allows you to choose different wallpapers throughout the day, and each day you will be presented with the same wallpapers that have been selected for that day. You can choose different wallpapers for work and different wallpapers for home. If you want to make your desktop appear different from day to day, this program is for you. Anti Screen-Saver lets you choose from several preset actions and you can use custom actions to perform alternative tasks. Antistarter also offers hotkeys so you can start it instantly by pressing a single key instead of launching the program from the system tray. After a few days using the program, we were able to figure out how it works without taking any trouble. It is very easy to configure and you can perform different actions and hotkeys from its interface. Robocopy is a simple file copying utility and it is extremely powerful because of a number of features that are bundled in it. While most Windows users know Robocopy as a file copying utility, it has a very powerful set of features that are useful for systems administrators. Robocopy Description: Robocopy is a very light weight file copying tool that will let you copy any files and directories or entire folders from one or more networked or local volumes. It will also let you perform other actions depending on the selected settings in the 'Advanced' tab. The main screen interface is simple and easy to use. When you click on the 'Copy' button, you will be asked whether you want to copy the files and/or folders or whether you want to perform a full-featured backup. This gives you a good idea about how big the job is that you are about to complete. In other words, Robocopy will ask you to perform a backup of only the directories and sub-directories that are empty or have no files inside. If you want a full-featured backup of the entire system, you will have to change a few settings in the 'Advanced' tab. Once you have selected your settings, you will be asked whether or not you want to perform a sequential backup. You will be able to configure the time settings in the 'Backup Settings' tab. If you want to perform a backup at a specific time of day,
